Digital Design 4

Adobe
Independent
Projects

This strand is designed to develop basic entry-level to advanced design skills required for careers in the digital publishing industry or for the casual user who enjoys the fun of learning how to use many of the Adobe programs including Photoshop (Image Editing), InDesign (Publication Design and Creation), Illustrator (Logo Design), Premiere Pro (Video Editing), and After Effects (Dynamic Effects). Through instructor-led lessons, students will apply and experiment with their skills and knowledge with projects of self-interest as well as past and current events. At every level, Digital I, II III and IV, we offer Adobe indusrty certifications. Our 2022-2023 school year pass rate for all certifications was a 96%.
