

MEETING THE ONLINE REQUIREMENT THROUGH CTE

Effective July 1, 2016, a student may satisfy the online requirement by completing a career technical course, or sequence of courses, AND achieving a nationally recognized industry certification in information technology identified on the Career and Professional Education Act (CAPE) Industry Certification Funding List (s. 1008.44, F.S.) or passage of a certification examination without enrollment in or completion of the corresponding course(s).

This includes students enrolled in Digital Information Technology, Applied Cybersecurity, Network Support Services, Network Systems Administration, Applied Information Technology, Computer Systems and Information Technology, Game/Simulation/Animation Programming, and Web Application and Development Programming.

A CAPE Digital Tools certificate does NOT satisfy this requirement.

For questions or further information, contact the Office of Career Technical Adult Education at 727-588-6006.
