How to Use Personalized Learner Pathway (PLP) with Middle School

**What is Personalized Learner Pathway (PLP)?**

The PLP is a student-specific platform that encourages buy-in and ownership of student learning. The pathway engages learners through standards-based, interactive content presented in various modalities. Safari Montage Playlists strategies are matched to students’ need based on the most recent benchmark performance.

The PLP links recent assessment data with targeted lessons, which give students information on their current status on their pathway to graduation. Additionally, students can enter accomplishments, work or volunteer experience for future resume building or college applications.

The PLP link found on Clever is accessible only to students using their district credentials to log in. Whether classroom learning stations or extended learning opportunities, teachers, counselors, administrators, parents, and mentors may now support student learning through PLP.

**How does PLP allow for the implementation of FSA remediation?**

- PLP identifies two components of FSA assessments – Math and ELA
  - PLP takes the most recent FSA assessment scores and assigns the student a Safari Montage Playlist which aligns to the appropriate FSA standard.
  - Students are then provided explicit/guided instruction and practice.

**When Students Track Their Progress, it Improves Ownership of the Learning**

- When students track their progress on assessments, the gains are even higher. According to Marzano, on average, the practice of having students track their progress was associated with a 32-percentile point gain in their achievement.
- The PLP provides two kinds of information for student remediation. First, the platform provides their FSA math and ELA scores of performances for each reporting category. Second, the platform provides standards-based, interactive content designed to support each student's progression of learning all within a safe, student-controlled space.
- The PLP, additionally, provides two more kinds of information for students to track their progress. First, students can monitor their Path to High School, focusing on the criteria needed to make the transition. Second, students can monitor their path to Future Readiness by staying up-to-date on Industry certifications and Honors courses.
