

Fine Art students created, sketched, and painted a beautiful mural in front of the main entrance of Dixie's Auditorium! Under the direction of Ms. Amy Williams, Fine Arts instructor, students brought a dull, white wall to life with color, designs and figures. The following narrative describes the meaning of this beautiful mural.

"This mural is about determination and triumph. Each one of our students has a story to write and if we as teachers and mentors, are luck enough, they will share it with us.

These kids must rebel against the negativity and challenges of society. They must rebel against the less than idea situations they live in. They have to break the cycles and rise above. They have to have determination to become something better.

Each one of the students depicted in the mural has inspired me in some way by the choice he or she has made. Each one of these students represent the kids that will follow down the unpaved path in years to come. They are not perfect. They will have failures and successes. But what is most important is not just the successes, but what they do with those failures.

This mural is to celebrate our students."

-Amy Williams, 2018
