Dolphin and Whale:

Dolphins and whales are animals that live in the ocean. They are mammals, not fish. They feed their young with milk produced by the mother. They also swim up to the surface to breathe, then dive below with a splash.

There was once a shoemaker who worked very hard but was also very poor. At last, all he had was just enough leather to make one pair of shoes. "I hope these turn out well," he said. "If we don't sell them, we'll have no food for the winter ahead." He cut out the shoes in the evening so that he could set to work on them the next morning. Then he went to bed and, leaving all his cares to heaven, fell asleep.
