

PCS Connects

- PCS Connects is our One-to-One student device initiative.
- Students in grades three through ten will be assigned a laptop to be used during the school day and at home.
- Digital resources will be embedded in daily face to face instruction to facilitate research, creation, critical thinking and collaboration.

PCS Connects Expectations

- The PCS Connects laptop is an important instructional resource. Just like textbooks and library books, students are responsible to take care of and not lose or damage the device.
- Students **should** bring their device to class each day fully charged and ready for learning.

Please complete the attached Computer Checkout form and return it to Mrs. Livingston in the media center or your child's teacher.
