# Online Reasoning in Research:

## PCS Level-Up

**Developing online research skills helps you to be better informed, less likely to be duped, and become a stronger critical thinker.**

## Who's Behind the Information?

Practice with a simulation scenario (Saturday School for all students!) to determine who creates posts, who makes themselves a part of the conversation, and how much weight should you give to their opinions?

This 30-minute self-paced Nearpod is the first lesson for the series. Students that complete all three will earn a certificate! Expires October 31st.

## Evaluating Evidence

Continue the scenario of Saturday School for all students with a deeper look at how evidence can be used to distract, distort, or just be irrelevant! How do you know good evidence from bad evidence?

This 30-minute self-paced Nearpod is the second lesson for the series. Students that complete all three will earn a certificate! Expires October 31st.

## Lateral Reading

Search behind the scenes of a Twitter account to practice lateral reading. How much can you tell from a Tweet, and how do you learn more?

This 30-minute self-paced Nearpod is the last lesson for the series. Students that complete all three will earn a certificate! Expires October 31st.
