

NATEF

The Automotive Academy has received certification by National Automotive Technicians Education Foundation (NATEF) and The National Institute for Automotive Service Excellence (ASE). To achieve this coveted recognition, the Automotive Academy underwent rigorous evaluation by NATEF. Nationally accepted standards of excellence in areas such as instruction, facilities, and equipment were used. Upon completion of the evaluation, NATEF recommended that the Automotive Academy be certified by ASE.

ASE is a national non-profit organization which tests and certifies repair technicians, in addition to certifying automotive training programs.

program of study

AUTOMOTIVE ACADEMY

Northeast High School's Automotive Academy combines technical, academic and workplace skills in an integrated curriculum in accordance with all National Automotive Technicians Education Foundation, Inc. (NATEF) guidelines. Students have the opportunity to earn nationally recognized Institute for Automotive Service Excellence (ASE) certifications and the Florida Automobile Dealers Association (FADA) Certified Technician certification.

The Academy is designed as a three to four-year course of study that prepares students for postsecondary education and the workplace. As students in a college preparatory program, qualified students may be eligible for Gold Seal Scholarships.

The automotive industry is a major sponsor of the Automotive Academy at Northeast High School. Local industry partners work closely with the Academy in an advisory role. They provide continuing technical education to the Academy team and make recommendations concerning the academic and technical curriculum necessary for student success.

AUTOMOTIVE MAINTENANCE AND LIGHT REPAIR

The Automotive Maintenance and Light Repair program focuses on understanding and demonstrating the skills necessary to successfully perform common maintenance and light repair tasks. Students are introduced to the principles of engine performance systems, transmission systems, steering and suspension systems, brakes, heating and air conditioning, and electrical systems. Students learn how to service, troubleshoot, diagnose, and repair engine systems. The program stresses understanding and demonstration of the following elements of the automotive industry: planning; management; finance; technical and product skills; underlying principles of technology, labor issues, community issues; and health, safety, and environmental issues.
