

2012 Climate Survey

Comparison: Title I and Non-Title I Schools

Pinellas County Schools

4/1/2012

Executive Summary

Pinellas County Schools 2012 Climate Survey Comparison: Title I and Non-Title I Schools

The 2012 Pinellas County Schools (PCS) Climate Survey was conducted in February 2012 and included numerous Likert item questions (Strongly Agree, Agree, etc.), and several extended response questions. Results from 45 Likert scale survey questions were collapsed into 13 constructs (categories) based on which groups of questions yielded highly correlated responses. The 13 constructs include:

- Confidence in District Leadership;
- Support from District Leadership;
- Administrative Support;
- Assistant Principal Support;
- Parent Support;
- Student Support;
- High Expectations (of students);
- Perceived Effectiveness (teachers);
- Parent Communication;
- Professional Development;
- Morale;
- Staff Collaboration;
- Global Satisfaction.

The purpose of this analysis is to compare climate survey results between PCS Title I schools and Non-Title I schools to identify areas of strengths and weaknesses within the climates of Title I schools. *Information from this study is intended to guide programmatic decisions where appropriate, such as more effective use of Title I funds for parental engagement and/or teacher professional learning.* Comparisons were made for each construct at each school level; elementary, middle, and high school. Tables 2, 3, and 4 display results for each school level and include Title I and Non-Title I school level and district percentages of agreement within each construct.

- The largest discrepancy between Title I and Non-Title I school survey results is in the category of *Parent Support*. *Seventy-seven percent (77%) of Non-Title I school staff reported strong parent support at their school, while only 34% of Title I school staff reported strong parent support at their school.*

- *Although middle school staff reported the lowest percentage of parent support for both Title I and Non-Title I schools, only 12% of the Title I middle school staff indicated their school had strong parent support (Non-Title I middle schools had 68%).*
- *Student Support was another area where staff from Title I schools reported much lower student support than staff from Non-Title I schools. The percent of staff from Title I schools that reported strong student support was 50% and the percentage from Non-Title I school staff was 79%.*
- *Similar to Parent Support, the lowest percentage of staff reporting strong student report was from middle school staff. Only 17% of Title I middle school staff reported strong student support, while 66% of Non-Title I middle school staff reported the same.*
- *Overall, middle school staff reported the lowest levels of agreement for each construct. However, the largest gaps between Title I and Non-Title I staff results exist at the middle school level in the areas of Parent Support, Morale, and Global Satisfaction.*
- *When analyzed individually, 5 Title 1 schools (Belleair Elementary, Maximo Elementary, Melrose Elementary, Bay Point Middle School, and John Hopkins Middle School) yielded noticeably low levels of perceived support from school administrators, parents, and students. In addition, these same 5 Title I schools' staff reported noticeably low levels of morale and job satisfaction.*
- *There were 4 elementary Title I schools (Blanton, Lynch, Sanderlin, and Seventy-Fourth Street), that yielded noticeably high levels of perceived support from school administrators, parents and students. These same schools also showed noticeably high levels of morale and job satisfaction.*
- *Although all Title I schools have written parent involvement policies in place, cultivating parent support to the levels necessary to affect student achievement at many Title I schools needs to be enhanced. Additional Title I resources need to be channeled effectively into building positive relationships with families.*

Introduction

Research provides evidence that a positive school climate directly impacts underlying indicators for success such as higher student achievement, lower dropout rates, decreased incidences of violence, and increased teacher retention. Empirical research has also shown that when school members feel safe, valued, cared for, engaged and respected, learning measurably increases, and staff satisfaction and retention are enhanced(National School Climate Council, 2011).

One major component of school climate is parent support and many studies have shown a strong correlation between parent support and a child's success in school (Ascher, 1988)(Hickman, Greenwood, & Miller, 1995). The authors of the Coleman Report (Coleman, et al., 1966) indicated that about one-half to two-thirds of the variance in student achievement could be accounted for by home variables rather than school variables. Similar evidence was found by Mosteller and Moynihan (1972) in their reanalysis of the Coleman data.

Over four decades of research provide convincing evidence that parents are an important influence in helping their children achieve high academic standards. When schools collaborate with parents to help their children learn and when parents participate in school activities and decision-making about their children's education, children achieve at higher levels. Thus, when parents are involved in education, children do better in school and schools improve.

Parental involvement has always been a centerpiece of Title I, and the reauthorized Elementary and Secondary Education Act (ESEA), also known as the *No Child Left Behind Act of 2001*, requires schools to involve parents in school programs and in the education of their children. *In fact, parents are mentioned over 300 times in various part of the No Child Left Behind act*(US Department of Education, 2000).

No Child Left Behind requires states and school districts to give parents easy-to-read, detailed report cards on schools and districts, telling them which ones are succeeding and why. With these provisions, *No Child Left Behind* ensures that parents have important, timely information about the schools their children attend--whether they are performing well or not, for all

children, regardless of their background. In addition, schools that receive Title I funds must develop a written parental involvement policy that establishes the expectations for parental involvement. The policy must be developed jointly with, and agreed upon with, the parents of children participating in Title I programs and distributed to parents of all children participating in Title I, Part A programs. *[Section 1118(a)(2), ESEA.]*

Written parent involvement policies must establish expectations for parental involvement, and describe how parents will assist in developing the School Improvement Plan. Parent Involvement Policies must also provide coordination, technical assistance, and other support necessary to assist Title I schools in planning and implementing effective parental involvement activities to improve student academic achievement and school performance and build the schools' and parents' capacity for strong parental involvement.

The purpose of this analysis is to compare climate survey results between PCS Title I schools and Non-Title I schools to identify areas of strengths and weaknesses within the climates of Title I schools. Comparisons were made for each construct at each school level; elementary, middle, and high school.

Survey Instrument

The climate survey was administered electronically through Survey Monkey to all school staff. The instrument contained 45 Likert items and 11 extended response opportunities for comments regarding each construct. Table 1 contains a list of each survey construct with the corresponding questions from the climate survey. This may be used as a reference when making inferences about the results. Close examination of Table 1 reveals that each construct has a minimum of 2 corresponding questions, with a maximum of 7 questions (Administrative Support).

Table 1

Constructs and Corresponding Questions

Construct	Survey Questions
Confidence in District Leadership 5 questions	<p>I have confidence in the ability of School Board Members</p> <p>I have confidence in the ability of the Superintendent</p> <p>I have confidence in the ability of the Deputy Superintendent</p> <p>I have confidence in the ability of the Region Superintendents</p> <p>I have confidence in the ability of District Leaders</p>
Support from District Leadership 3 questions	<p>District leadership communicates well with personnel at this school.</p> <p>District leadership considers input from stakeholders before making decisions that affect my school.</p> <p>District leadership provides my school with the tools necessary to be successful.</p>
Administrative Support 7 questions	<p>I trust my Principal’s decision making process.</p> <p>The Principal is liked and respected by staff.</p> <p>The Principal inspires teamwork among the staff.</p> <p>My Principal treats me with professional respect.</p> <p>School administrators are responsive to concerns of staff.</p> <p>School administrators promote an atmosphere of respect and collegiality.</p> <p>At this school, administrators and staff work together to develop goals and values that guides us.</p>
Assistant Principal Support 3 questions	<p>The Assistant Principal facilitates communication effectively.</p> <p>The Assistant Principal is an effective instructional leader.</p> <p>The Assistant Principal treats me with respect.</p>
Parent Support 2 questions	<p>Parent support for this school is strong.</p> <p>Parents are actively involved in student learning at this school.</p>
Student Support 4 questions	<p>Students are well behaved at this school.</p> <p>Students show respect toward each other at this</p>

	school.
	Students show respect toward adults at this school.
	Students work hard to achieve academic success at this school.
High Expectations 3 questions	Teachers care if students learn at this school. Teachers at this school have high expectations of all students.
Perceived Effectiveness 4 questions	Quality work is expected of all students at this school. I work effectively with low-achieving students. I work effectively with an ethnically/socially diverse population of students. I work effectively with Exceptional Education students. I work effectively with Limited English speaking students.
Parent Communication 2 questions	Teachers at this school communicate with parents often about their child's progress. Teachers at this school communicate with parents often about class activities.
Professional Development 3 questions	I am provided with meaningful opportunities to improve my skills. I have the opportunity to develop my skills. This school is committed to promoting professional development.
Morale 4 questions	Morale is high in this school. Morale is high in this school among Support Staff. Morale is high in this school among Teachers. Moral is high in this school among Administrators.
Staff Collaboration 3 questions	Staff treats one another with respect at this school. Staff collaborates well with each other at this school. There is a climate of trust among staff members.
Global Satisfaction 2 questions	Overall, I am satisfied working at this school. I look forward to coming to work at this school.

Survey results were disaggregated by school and comparisons were made between Title I and Non-Title I schools at the elementary, middle, and high school levels. In addition, Title I schools were examined individually in order to identify outliers; schools that indicated markedly lower or higher positive school climates when compared to their peers.

Results

Results from 45 Likert scale survey questions were collapsed into 13 constructs (categories) based on which groups of questions yielded highly correlated responses. Comparisons were made for each construct at each school level; elementary, middle, and high school. Tables 2, 3, and 4 display results for each school level and include Title I and Non-Title I school level and district percentages of agreement with each construct. Table 2 displays results from Title I and Non-Title I elementary level survey results.

Closer inspection of Table 2 reveals that the two areas where the largest gaps between Title I and Non-Title I schools occur is *parent and student support*. While 82% of the staff from Non-Title I elementary schools indicated there was strong parent support at their schools, only 34% of the staff from Title I elementary schools agreed that parents from their schools were supportive. Student support at Title I elementary schools fared better; 55% of Title I staff indicated support from students, compared to 86% of the staff from Non-Title I elementary schools that agreed there was student support for their schools.

Table 2

Elementary Title I and Non-Title I Survey Results

Construct	Title I Elementary Agree	Total Title I Agree	Non-Title I Elementary Agree	Total Non-Title I Agree
Confidence in District Leadership	75%	70%	72%	68%
Support from District Leadership	58%	54%	56%	53%
Administrative Support	81%	79%	80%	79%
Assistant Principal Support	89%	86%	87%	84%
Parent Support	34%	34%	82%	77%
Student Support	55%	50%	86%	79%
High Expectations	96%	92%	98%	96%
Perceived Effectiveness	96%	95%	98%	97%
Parent Communication	95%	88%	98%	92%
Professional Development	91%	89%	89%	85%
Morale	65%	60%	67%	63%
Staff Collaboration	84%	84%	87%	86%
Global Satisfaction	81%	80%	88%	87%

In addition, the percentage of Title I elementary staff indicating strong student support (55%) is higher than the district Title I schools' percentage (50%). In all other constructs the Title I and Non-Title I elementary school results were very similar. Table 3 displays results from Title I and Non-Title I middle school level survey results.

Closer inspection of Table 3 reveals that the two areas where the largest gaps between Title I and Non-Title I schools occur is *parent and student support*. While 68% of the staff from Non-Title I middle schools indicated there was strong parent support at their schools, only 12% of the staff from Title I middle schools agreed that parents from their schools were supportive. Student support at Title I middle schools fared slightly better; 17% of Title I staff indicated support from students, compared to 66% of the staff from Non-Title I middle schools that agreed there was student support for their schools.

In addition to the differences between Title I middle school responses and Non-Title I responses, there were gaps between Title I middle schools and all Title I schools combined. The percentage of Title I middle school staff indicating strong parent support (12%) is lower than

the district Title I schools' percentage (34%), as is the percentage of staff indicating strong student support at their middle school (17%) compared with all Title I schools in the district (50%). Title I middle school staffs also reported much lower levels of morale and global satisfaction than did the Non-Title I middle school staffs.

Table 4 displays results from Title I and Non-Title I high school level survey results. *Parent and student support* are also the two areas where the largest gaps between Title I and Non-Title I schools exists. While 71% of the staff from Non-Title I high schools indicated there was strong parent support at their schools, only 45% of the staff from Title I high schools agreed that parents from their schools were supportive. Student support at Title I high schools fared slightly better; 56% of Title I staff indicated support from students, compared to 72% of the staff from Non-Title I high schools that agreed there was student support for their schools. In all other constructs the Title I and Non-Title I high school results were very similar.

In addition, the percentage of Title I high school staff indicating strong parent support (45%) is higher than the district Title I schools' percentage (34%), as is the percentage of staff indicating strong student support at their high school (56%) compared with all Title I schools in the district (50%). Comparatively, Title I high schools indicated they have stronger support from these two groups than the Title I elementary and middle schools.

Table 3

Middle School Title I and Non-Title I Survey Results

Construct	Title I Elementary Agree	Total Title I Agree	Non-Title I Elementary Agree	Total Non-Title I Agree
Confidence in District Leadership	64%	70%	62%	68%
Support from District Leadership	38%	54%	48%	53%

Parent Communication	76%	88%	77%	92%
Professional Development	86%	89%	86%	85%
Morale	61%	60%	61%	63%
Staff Collaboration	86%	84%	86%	86%
Global Satisfaction	86%	80%	86%	87%

The survey results from middle schools were clearly the outliers in the climate survey for both Title I and Non-Title I schools. Overall, middle school staff report lower support from administration, parents, students, and the district. They also reported lower morale and satisfaction at their schools than did the Title I elementary and high school staffs.

When analyzed independently, 5 Title I schools surfaced with alarmingly negative climate school results, while 4 Title I schools emerged with overwhelmingly positive climate survey results. Tables 5 and 6 display a summary of climate survey results for these schools. Table 5 displays the 5 schools that indicated significantly lower levels of administrative, parent, and student support, and morale/global satisfaction. Results from selected Likert scale survey constructs were collapsed into three constructs (categories) based on which groups of

questions yielded highly correlated responses. Parent and student support results were combined into one construct, and morale/global satisfaction were combined to form another. Support from school administrators remained the same.

Survey results from each of these 5 schools are noticeably below total Title I school level results. Staff from Melrose and Belleair Elementary Schools indicated much lower perceived support from school administration (35%) (31%), parents and students, (4%) (18%) than their Title I peers, and lower levels of morale and job satisfaction (22%) (28%). Two Title I middle schools yielded lower levels of administrative, parent and student support and morale/job satisfaction.

Table 5

Individual Title I School Concerns

School*	Support from School Administrators % Agree		Support from Parents Students % Agree		Overall Satisfaction Morale % Agree	
	<i>School</i>	<i>Title I</i>	<i>School</i>	<i>Title I</i>	<i>School</i>	<i>Title I</i>
	Belleair Elementary	31%	81%	18%	48%	28%
Maximo Elementary	55%	81%	14%	48%	38%	71%
Melrose Elementary	35%	81%	4%	48%	22%	71%
Bay Point Middle	38%	61%	9%	15%	22%	43%
John Hopkins	45%	61%	7%	15%	23%	43%

*Individual school results are included in the Appendix.

Contrary to the results in Table 5, the results in Table 6 displays survey results from Title I schools which indicated healthier school climates. Each of these 4 schools had 100% agreement of perceived support from school based administration and over 90% of the staff indicated high levels of morale and satisfaction with their job. Title I high schools had less variability in staff responses.

Table 6

Individual Title I School Successes

School*	Support from School Administrators % Agree		Support from Parents Students % Agree		Overall Satisfaction Morale % Agree	
	<i>School</i>	<i>Title I</i>	<i>School</i>	<i>Title I</i>	<i>School</i>	<i>Title I</i>
	Blanton Elementary	100%	81%	91%	48%	99%
Lynch Elementary	100%	81%	64%	48%	95%	71%
Sanderlin Elementary	100%	81%	94%	48%	95%	71%
Seventy-Fourth Street	100%	81%	62%	48%	93%	71%

*Individual school results are included in the Appendix.

Conclusions

Despite the fact that parent support is one of the cornerstones of Title I, and the reauthorized *No Child Left Behind Act of 2001*, it continues to be elusive according to Title I school staff members. In particular, middle school staffs' report alarmingly low levels of perceived parent support. Although all Title I schools have written parent involvement policies in place, cultivating parent support to the levels necessary to affect student achievement at many Title I schools needs to be enhanced.

A Title I teacher survey was also administered in March 2012 to all Title I teachers. When asked to identify the most important challenges presented at their school, a lack of parent involvement was one of the predominant challenges cited by Title I teachers. However, when asked to rank the following areas (Professional Development, Additional Personnel, Additional Classroom Materials, Additional Technology, and Parent Involvement), by order of where most Title I funds should be spent within their school, parent involvement overwhelmingly ranked last.

Ranking funding for parent involvement last may suggest the existence of underlying beliefs or expectations teachers have regarding parent involvement or an assumption that parents *should* know to be involved in their child's education, so we don't need to use funds. Or these results could also suggest that teachers separate the idea of parent involvement from daily classroom instruction. A paradigm shift in teacher attitudes may be necessary in order to overcome this barrier.

Although perceived by staff as higher, a lack of student support was also the experience reported by many Title I school staff members, particularly middle school staff. When combined with results from the Title I teacher survey, many teachers cited poor student discipline and motivation as other important challenges faced by their school. This was particularly the case at the middle school level.

The climate survey results also suggest potential crises on the horizon for the 5 schools with negative school climates. All but one is located in south St. Petersburg. Two of the elementary schools, Maximo and Melrose, are current "F" schools and have new principals that were assigned this year. However, Belleair Elementary has had the same administration for the past

3 years, and has a very transient population of students. While the gaps are less radical between the Title I middle schools, Bay Point and John Hopkins Middle Schools are noticeable. Both of the middle schools also serve as magnet schools. Survey results from the 4 schools with high percentages of perceived support and morale are all elementary schools and all but one is located in central St. Petersburg.

Because parent and student support is so critical to student success and increases in achievement, these results should serve as a catalyst for needed changes in school and district practices regarding parent involvement within Title I schools.

Recommendations

A needs assessment should be conducted regarding teacher, parent, and student attitudes relating to school climate, parent support expectations, and student support in order to determine the root cause of the perceived lack of support and underlying expectations. We need to determine why teachers believe support from parents and students are lacking within their schools. Comparing attitudes of teachers between the schools with perceived positive climates and schools with negative climates may yield insight into the characteristics that separate the two groups.

Once needs assessments are conducted, the following options should be considered:

- Considering the sizable emphasis Title I places on the importance of parent involvement, professional development to train teachers how to work effectively with parents or specific strategies on how to target and increase parent involvement should be offered.
- Establish parent involvement Individual Professional Development Plan (IPDP) goals for all Title I teachers.
- Parent training should be offered that includes skill-building activities such as how data is used to increase student achievement, understanding report cards, lexile scores, FAIR data, etc. and to explain some of the bureaucratic language into meaningful terms.
- Implement more technology such as Skype, Elluminate, etc. for parents to access for conferences, meetings, etc.
- *Home-school partnerships* should be established that address the full range of family and student needs that impact learning. It should be specific and should articulate how parents will be assured adequate and meaningful involvement. Importance should also be placed on the two-way relationship between home and school. Teachers should understand family cultures, strengths, and weaknesses.
- Establish parent involvement case managers whose responsibility is to act as the liaison between teachers and parents on a daily basis, contacting various parents each day in order to inform them of classroom events, school activities and answer parent

questions. This will foster a positive relationship between home and school and help in identifying home cultures, strengths, and weaknesses.

Building the capacity of teachers, parents, students, and all school staff to work together through training, professional development, and two-way conversations is essential to the success of all students, but particularly those who are disadvantaged. The following Appendix contain climate survey analyses for individual Title I schools. As indicated, some schools fell above or below the district Title I percentages of agreement within specific constructs.
