So how does online education work? Online education is done asynchronously, meaning that you complete your work at your own pace staying within a specific timeframe. While there will be deadlines and due dates, you're largely on your own when it comes to setting up a study schedule, a format that works well for some but creates trouble for those prone to procrastination. Engagement with classmates and your instructor will take place on-line only during this portion of the program.

30 class hours, April 16, 2018 – May 16, 2018
