

Know Before You Go COVID-19

Aetna is waiving member cost-sharing for diagnostic testing related to COVID-19. The test can be done by any authorized testing facility. *Always seek the advice of your physician or other qualified health provider with any questions you may have regarding COVID –19.*

How can I access COVID –19 testing?

- Members who have concerns that they may have been exposed to COVID-19 or may have symptoms of COVID-19 should contact their health care provider. A list of Aetna providers offering testing can be found beginning on page 2 of this document. For more information on Aetna’s COVID-19 support, visit <https://www.aetna.com/individuals-families/member-rights-resources/covid19.html>
- For the most up to date COVID –19 testing locations in Pinellas County please visit <https://covid19.pinellascounty.org/testing/>
- The COVID –19 testing site availability depends on staff, supplies and resources for that day. Tests are administered by nasal or pharyngeal swab. Lab samples are sent to an offsite laboratory and typically returned within 2-4 days but may take 5-7 days in times of peak demand. Based on the offsite lab’s volume your response time may vary.

Is there a difference between diagnostic testing and antibody testing?

- **Yes.** Diagnostic testing for COVID-19 is performed via a nasal swab and can detect the active virus. Antibody testing checks a sample of a persons blood to look for antibodies. This test is performed on asymptomatic patients and can detect antibodies developed from a past infection.

For latest information from the CDC regarding COVID 19 please visit:
