October is Breast Cancer Awareness Month

About 1 in 8 women will develop breast cancer in their lifetime. Breast cancer is the second leading cause of death among women. There is no way to prevent this disease so it is important to get screened early and often. Women over the age of 40 are recommended to receive a mammogram annually. This screening can detect groups of cells found in the breast that may be cancerous. In addition to annual mammograms, all women, regardless of age, should perform self examinations every month to check for any changes in their breast tissue. To learn more about self examinations, visit nationalbreastcancer.org.

October Challenge

Coming Soon Challenge
Anticipate Today

The Coming Soon Challenge invites you to write something down you’re anticipating in the next 24 hours, each morning (or evening) for the next 30 days. If you don’t have anything you’re looking forward to, adjust your schedule a bit and plan to do something you will enjoy each day. Set up a virtual coffee date with a distant friend or family member. Choose to eat one of your favorite meals for dinner. Set aside to work on a project you really enjoy. Think of something during your work day you enjoy, like working with a certain person or doing a certain type of work. Your anticipation will be more fun and much greater if you make your plan a few days or even weeks in advance.

Simply anticipating something you’re looking forward to can be just as satisfying as actually experiencing it. So why not anticipate many good things in your life? This way you get to enjoy them twice—once in anticipation and then again when you actually have the experience! Having something to look forward to makes life more enjoyable. It’s simple: look ahead, anticipate, and then enjoy!
