Guidelines for Success:

1. Have the school-wide GFS expectations been clearly identified?
2. Are common-area expectations posted and clearly communicated?
3. Have the classroom expectations/rules been clearly identified, posted and clearly communicated?

Questions to guide discussion:

THE MUSTANG WAY

Show Respect for myself and others by:
Keeping hands and feet to self
Using quiet voices in quiet zones in the building
Walking throughout the building
Leaving all toys, games and electronic devices at home
Being kind to others

Be Responsible for my learning by:
Being prepared for school
Arriving to school on time and staying until dismissal

Be Honest by:
Telling the truth
Admitting mistakes
Solving the problem

Cafeteria
Being kind to everyone

Eating only your food
Speaking only to those students at your table
Entering the cafeteria in an orderly line.

Raising your hand when you need something.

Picking up all of your trash and placing it in the garbage can.

Walking to line up with your class
Telling the truth

Admitting mistakes
Solving the problem

Hallways
Keeping hands and feet to self
Using quiet voices in quiet zones in the building

Benchmarks of Quality Score: 85 / 107 = .79
Walking throughout the building

Respecting that learning is taking place

Being kind to others

Benchmarks of Quality Score: 85 / 107 = .79
Goal 1: Reduce the number of in-school suspensions

A. Strategies to reduce or eliminate barrier for this goal, B. What are the barriers to achieving this goal that were validated by the problem solving team?

Use of consistent behavior management plan and data across classrooms
REVISED - Barriers - inconsistent use of behavior management plans in individual classrooms
inconsistent understanding of major/minor discipline issues

Strategies to reduce barriers - Use of school wide behavior management plan. All classrooms using 5 point scale. All students starting in on middle level

Implementation Steps
Staff trained with new school wide behavior plan

Person(s) Responsible
Classroom Teachers
Administration
Behavior Specialist

Goal 1 Data Collection and Management:

1. Did your team access and use the student data information systems?
2. What is the correlation between reinforcement of positive behaviors and targeted behaviors?
3. Does the plan identify types of data needed, data system to access, and person(s) responsible for data collection and reporting?
4. Does the plan identify a regular schedule of data and analysis?

Develop A School-Wide Reward/Recognition System Aligned To Targeted Behavior:

1. How, when, where, and by whom will strategies be implemented?
2. Are documented strategies evidence-based and aligned to data – e.g., explicit description of the procedure/practice, clear definition of the settings and implementers who use the procedure/practice, identification of the population of individuals who are expected to benefit, and the specific outcomes expected?

<table>
<thead>
<tr>
<th>Strategy</th>

<td>Ongoing</td>
<td></td>
</tr>
</tbody>
</table>
Action Plan:
Plan to Monitor for Fidelity of Implementation

Classroom teachers to create a school wide behavior system in their classroom

SBLT will use behavior data from individual classrooms to make decisions

SBLT will monitor the data on individual students or classrooms to see if interventions/recommendations are appropriate

SBLT will use data to monitor the absences of students

When a student reaches 5 absences, the SBLT will begin to monitor their attendance twice a month
Professional Development:
List Professional Development Opportunities Aligned To The Positive Behavior Supports

PLCs used to discuss behavior data and issues

ASD 101 will be offered to staff (several of the strategies can be used/altered to work in the general education setting)
Midyear:
1. Which goals, barriers and strategies were revised based on response to intervention?
2. What evidence was used to drive the revisions?

Be sure to include how you are addressing the discrepancy between Black and Non-Black discipline in your response to intervention discussion.

Enter a summary of the current status of implementation

Goal 1
The number of in school suspensions (13) for the 1st semester of 2014/2015 is the same as the 1st semester of 2013/2014. Both years, the number of students with the in school suspensions was 8. Currently, two students who received in school suspensions have new FBA/PBIPs. One of the students has been placed in the ASD self contained classroom and one student has been placed on a check in/check out system.

Goal 2
Currently for the 1st semester of 2014-2015, we have had 50 total referrals. This is above the number of referrals for first semester of 2013/2014. This is the first year that our teachers have used a common behavior management plan (a five level system) throughout the school. The next step is for teachers to begin to collect data for those students on our behavior radar list, discussed at SBLT and a part of our behavior database. This data can then be used to focus on student interventions or classroom interventions.

Goal 3
Our SBLT meets twice a month to discuss absences, tardies and early release. Students are sent home a letter when they have reached 10 excused or unexcused absences. Tardies are also discussed and parents are given a letter when there are excessive tardies.

To help the discipline discrepancy between black and non-black. We have had a total of 3 black students who have received a referral. Two of those students have had multiple referrals. Those two students have FBAs and have an active intervention plan.

Oakhurst Elementary continues to infuse character into academics. Each classroom receives a book of the month that correlates with the character trait of the month.

ASD 101 training was offered to staff members, the training consisted of several interventions and accommodations that can be used in the general education classroom with all students.

We have implemented a Check in/check out program. We currently have 6 students on this program.

REVISION - Evidence based interventions being used for our 3 African-American students with discipline referrals are 2 of the students have FBAs and one has a PBIP. All the students are on a CICO system with daily tracking of points as a visual for both students and teachers. The students have an individualized behavior plan that focus on their behavior of concern, as well as reinforcers that are chosen by the students. The data for the FBAs and PBIPs are reviewed, as well as a change of intervention if necessary. The data has shown that there has been a decrease for one of the students. One student recently had a FBA review and the intervention was changed. Next steps for these students are continued monitoring of their plans with possibility of one possibly being looked at for evaluation based on RTI.
