# MAD SCIENTIST CLUB

## COURSE REGISTRATION FORM

### Magic, Forces, & Flight!

Students will participate in 6 of the following exciting sessions!

**Science of Magic** - Magic? No... it's science! Learn the secrets behind famous magic. Mother nature has some tricks of her own, and we'd like to show you what's up her sleeve!

**Under Pressure** - Join Bernoulli and Newton as we take this exciting look at the science behind aerodynamics and the properties of air under pressure. Create air pockets with a punch to levitate ping-pong balls and powerful swirling vortices.

**Che-mystery** - Eliminate the mystery in chemistry! Explore this exciting and fundamental science as you tie-dye some milk and take home a dynamic dish for home experimentations!

**Current Events** - Take a tour on the electron freeway! Explore conductors, insulators, transistors, and other elements in the world of circuit electricity. Hear & feel electricity!

**FUNDamental Forces** - This intro to physics is so much fun! We will explore gravity, inertia, and centripetal force. Experience these awesome forces and build some cool devices to watch them at work!

**Wacky Water** - Create your own Wave Simulator while exploring the properties of water and density. Simulate an ocean oil spill and use the power of polymers to clean it up!

**Fantastic Fliers** - Explore fundamental principles of flight. Make awesome gliders with control surfaces. Build & take home several different fliers. You will be a flying ace after this class!

**Super Structures** - Discover the strengths of triangles, cylinders and arches. Combine them to build super structures as well as an earthquake-proof building!
