

IB Summer Reading Assignments

9th Grade

PIB English II

1. Read *The Hen Who Dreamed She Could Fly* by Sun-Mi Hwang (ISBN: 978-0-14-312320-0)
2. Write a one page personal response to the text. Your response might include the answer to one or more of the following questions...
 - Which character in the novel are you most like? Why?
 - Were there any parts of the novel that surprised you? Explain.
 - Did the novel remind you of any other book(s) you have read? Which one(s)? Explain.
 - The acacia tree is important to Sprout. What do you think it represents? Explain.
3. Turn in your response on the first day of your freshman English class.

***Any questions? Please email Mr. Benton bentonro@pcsb.org or Ms. VanDuyne, vanduyne@pcsb.org

12th Grade

HL Spanish

Work was assigned by Mrs. Bosco during the school year. Please contact Mrs. Bosco with any questions at boscog@pcsb.org

You do NOT need to buy any workbook.

SL Spanish

Complete the sheet with deadlines provided in class before break. Assignments have been posted on ManageBac; steps and requirements to prepare and get ahead on the Written Assignment will be posted in the future.

Students will have to complete assignments on the VHL Central website as well as six readings with their corresponding comprehension questions.

For the Written Assignment, students have to find three to four articles on the topic that was approved and complete a worksheet to prepare the Rationale.

SL Biology 2

IA Preliminary Submission

DUE AUGUST 12th by 11pm to ManageBac

*State your research question. It should be *fully focused*. Complete the following:*

1. Sufficient, RELEVANT background research. Use the exploration criterion in the IA rubric (*in your student manual*) as a guide. Resources should be cited here. **(1 page minimum)**
2. A ***detailed*** description of your procedure including sampling methods and type of data collected. This must be specific! Be sure to include any safety, ethical and/or environmental concerns.
3. Blank data tables with titles, heading units, and uncertainties where appropriate. Remember, you need to collect **sufficient** data. The 5x5 model-five conditions with five replicates-is the minimum. Some investigations will require a larger sample size.
4. A description of all statistical tests that you plan to use analyze your data. This should include the name of the test, the formula(s), a description of how you will use it in YOUR investigation, and one same (hypothetical) calculation. Examples include standard deviation, chi-squared, t-test, regression and correlation. Refer to the statistical analysis handout for guidance. **Formulas and sample calculations are required.**

This is a great resource for choosing and using the right statistical tests.
