

# How to Access Istation and ST Math at Home using Clever

## Istation on Computer

You must have the Istation program downloaded to your computer in order to open it. Istation is not a web based program and therefore requires you to download it. When you try to launch Istation if you have not downloaded the program it will prompt you to do so

1. Open a web browser (I tested it with both Chrome and Firefox) and go to [www.clever.com](https://www.clever.com)
2. On the top right of the screen click on ‘Log in as a student’

3. Start typing in Leila and you will see our school listed. Click on Leila Davis Elementary

4. Click the Login with Active Directory button

5. Use your student's username and new password. (In most grade levels the new password has changed to a capital s followed by a period and student number) example S.12345678

6. Once the clever portal screen has opened, you can click on the Istation program

7. If your program launches skip to step number 13

If you get a message that says "Launch Failed! See below for more information" that means that the program is not installed. Click the blue Download Istation link on the screen for more help.

Launch Failed! See below for more information:

Launching Applications from Chrome

When launching Istation from the Google Chrome browser, you may see a prompt like the sample image on the right asking for your permission to launch the Istation Application.

1. Check "Remember my choice" if you do not want to see this message again.  
2. Select "Launch Application" in order to proceed.

[...Read More Details](#)

Have you Downloaded Istation?

Make sure you have installed the most recent version of the Istation Application in order to use single sign on.

[Download Istation](#)

External Protocol Request

Google Chrome needs to launch an external application via an Istation link. The link requested is `istation://doSSO?token=ehbSWWhGHu0d1Qbj7NDmGOMAGmVw&url=https://www.istation.com/`. The following application will be launched. Do you accept this request?

`"C:\Program Files (x86)\Istation\Istation.exe" -o //doSSO?token=ehbSWWhGHu0d1Qbj7NDmGOMAGmVw&url=https://www.istation.com/`

If you did not request this request, it may represent an attempted attack on your system. If you took an explicit action to initiate this request, you should accept it.

Remember my choice for all links of this type.

[Launch Application](#) [Do Nothing](#)

8. Choose the appropriate download link. You can install through Goggle Play, Apple App Store, Windows, Mac Devices, and Chromebooks

9. Follow the install steps.

10. Once installed it will launch the Istation program. You will need to associate the program to the correct domain. The easiest way to do this is to start typing leila. Click on the davis.pinellas.fl and click OK

11. At the sign in screen you should see the davis.pinellas.fl domain listed in red right under the words Istation. If for some reason, the wrong domain is there type CONFIG in both the username and password boxes and click OK. This will allow you to reset your domain.

12. Once your domain name is set you CANNOT log in from this screen. You will get an error message that says "oops, looks like that ID and password didn't work" You must go back to the clever screen and click Istation again like you did in Step 6

13. When Istation launches correctly you will get a message box the prompts you to open url, launch program etc. Follow that step and click the correct box

14. A screen will appear that says, “Attempting single sign-on...” This may take a few moments

## ST Math on Computer

Follow steps 1-7 above. This time click on the ST Math Icon

Click on JiJi the Penguin (Be sure to click on the daytime JiJi not the one with a close up of his face)

ST Math should launch and sign in

You may have to click Allow for the Flash Player Setting

You will then be ready for ST Math at home!

## **Istation on IPad or Tablet**

Using Istation on an IPad or Samsung tablet follows the same basic steps listed above. You must have the App already installed through the App Store. Then follow the same steps above by going to the internet and going to [www.clever.com](http://www.clever.com)

One troubleshooting tip for an IPad or tablet is to make sure the App is up to date. I have found that on the ipads at school that I had to manually update the app to get it to launch through Clever. If all else fails try deleting the App and re-installing it.

If you try to just click on the App itself and enter username and password, it will not work. You must go through Clever.

## **ST Math on IPad or Tablet**

Again, you must go through Clever. Make sure the App is up to date. I have noticed that the ipads at school will show a connection error message when the App was out of date. After updating the App, it launched the program through Clever
