

M/J Visual Art 2 (#0101110) 2015 - And Beyond (current)

This document was generated on CPALMS - www.cpalms.org

Aligned Standards

Name	Description
VA.68.C.1.3:	Identify qualities of exemplary artworks that are evident and transferable to the judgment of personal work. Clarifications: e.g., personal, cultural, historical
VA.68.C.3.2:	Examine and compare the qualities of artworks and utilitarian objects to determine their aesthetic significance. Clarifications: e.g., comparison, classification, cause and effect, reasoning, hypothesizing, critiquing
VA.68.F.1.1:	Use non-traditional thinking and various techniques to create two-, three-, and/or four-dimensional artworks. Clarifications: e.g., potential to transfer and incorporate technological applications
VA.68.F.2.5:	Create an artist statement to reflect on personal artwork for a portfolio or exhibition.
VA.68.H.3.2:	Discuss the use of background knowledge and critical-thinking skills, learned in the visual arts, to understand varying concepts, viewpoints, and solutions. Clarifications: e.g., identify facts, ideas, problem-solving skills
VA.68.H.3.3:	Create imaginative works to include background knowledge or information from other subjects. Clarifications: e.g., from history, environment, literary works
VA.68.O.1.3:	Combine creative and technical knowledge to produce visually strong works of art.
VA.68.O.2.1:	Create new meaning in artworks through shared language, expressive content, and ideation.
VA.68.O.2.4:	Select various media and techniques to communicate personal symbols and ideas through the organization of the structural elements of art.
VA.68.S.1.4:	Use accurate art vocabulary to explain the creative and art-making processes.
VA.68.S.2.2:	Create artwork requiring sequentially ordered procedures and specified media to achieve intended results.
VA.68.S.2.3:	Use visual-thinking and problem-solving skills in a sketchbook or journal to identify, practice, develop ideas, and resolve challenges in the creative process.
VA.68.S.3.1:	Use two-dimensional or three-dimensional art materials and tools to understand the potential and limitations of each.
VA.68.S.3.3:	Demonstrate understanding of safety protocols for media, tools, processes, and techniques.
VA.68.S.3.5:	Apply two-dimensional techniques and media to create or enhance three-dimensional artwork.
MAFS.7.G.1.1:	Solve problems involving scale drawings of geometric figures, including computing actual lengths and areas from a scale drawing and reproducing a scale drawing at a different scale.
MAFS.7.G.1.2:	Draw (freehand, with ruler and protractor, and with technology) geometric shapes with given conditions. Focus on constructing triangles from three measures of angles or sides, noticing when the conditions determine a unique triangle, more than one triangle, or no triangle.
MAFS.7.G.1.3:	Describe the two-dimensional figures that result from slicing three-dimensional figures, as in plane sections of right rectangular prisms and right rectangular pyramids.
MAFS.K12.MP.6.1:	Attend to precision. Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
MAFS.K12.MP.7.1:	Look for and make use of structure. Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y .
LAFS.6.L.1.2:	Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing. a. Use punctuation (commas, parentheses, dashes) to set off nonrestrictive/parenthetical elements. b. Spell correctly.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

GENERAL NOTES

Students investigate contemporary and historical art themes using 2D and 3D media, skills and techniques; while engaging in the art production process within a studio arts environment. Projects may include but are not limited to: drawing, painting, printmaking, collage, mixed media, pottery, and sculpture. Students create new meaning from various media formats, and communicate artistic ideas through the intentional use of the elements of art within their work. Students interpret meaning in their artwork and the artwork of others through discussion, on various artistic concepts, viewpoints, and themes; drawing their own conclusions and employing this knowledge both expressively and technically.

English Language Development (ELD) Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <http://www.cpalms.org/uploads/docs/standards/eld/SI.pdf>.

For additional information on the development and implementation of the ELD standards, please contact the Bureau of Student Achievement through Language Acquisition at sala@fldoe.org.

GENERAL INFORMATION

Course Number: 0101110

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Art - Visual Arts > **SubSubject:**

Art Comprehensive >

Abbreviated Title: M/J VISUAL ART 2

Course Length: Semester (S)

Course Type: Elective Course

Course Level: 2

Course Status: Course Approved

Educator Certifications

[Art Education \(Secondary Grades 7-12\)](#)

[Art \(Elementary and Secondary Grades K-12\)](#)
