5 min Behavior & Attendance Updates

- 14 referrals; risk ratio of black students is 1.4%
- Behavior change and trends (day 42 from last year to this year)-bullying reports have increased; number of reports does not necessarily mean bullying is becoming problematic but could instead be a reflection of students becoming more aware and knowledgeable of reporting procedures. Class disruptions have increased. Buddy Bench was rolled out during Peace Week but have not gotten much feedback possibly due to construction.
- Mrs. Knapp, Guidance Counselor, went into two of each grades 3-5 classrooms to give bullying survey; learning and awareness is strong, bullying occurs most in recess/YMCA/hallways/cafeteria, 'are consequences effective question'-do students know what the consequences are?, males are largest group who are bullying; administration is seeing some correlation between student survey and bullying reports.
- Restorative practices-specific questions, reflection forms, Bear Huddle every month.
- Absences-8% students absent 10% or more, 41% perfect attendance, 2% absent 20% or more; we are in the green for all areas.

5 min Campus Updates & School Safety

- Previous construction meeting stated project will be postponed for 60 days but now only postponed 7 days; getting workers level 2 clearance may have been a factor; projected date 11/12 (bldg. 1,2,3) January (bldg. 7); front sidewalk will be open next Tuesday (bldgs. 4,5,6 will have access from north side) but back sidewalk from bus gate will remain closed.
- Irrigation is still TBD
