

An Introduction to Meadowlawn's Personalized Learning Program

What Does Our Program Look Like?

- **Students will be given a roadmap at the start of a unit**
 - Centered around the state standards for the content area
 - Includes all the skills needed to master the standards in the unit
 - Contains a variety of choices for how to master each skill
 - Helps students keep track of where they are and where they need to go
 - Is kept in their binder
- **Students are given a goal sheet with the roadmap**
 - They are asked to make a plan for:
 - What choices they will make
 - How long they'll spend on each skill (to be put in their planner)
 - How they'll demonstrate their learning at the end of the unit
 - Also kept in binder
 - They are held accountable to finish all work by the hard deadline

What Does Our Program Look Like?

- **Teachers will have whole group/small group instruction time**
 - Based on student need and teacher preference
- **Teachers will regularly check in with students to:**
 - Gauge progress
 - Ensure they stay on pace
 - Provide feedback on student work
- **Students will work by themselves, with a partner, a small group, or the whole class**
- **After they feel they've mastered a skill, they will do a skills check**
- **If they pass, they will move onto the next skill**
 - If not, they will choose a different mastery option to try to better learn the skill
 - There are times where this will include one-on-one work with the teacher
- **Once they've mastered all skills, they attempt the Performance Task for the unit**
 - Process above repeated until student masters the unit, or reaches the deadline
