

TZ Science: Study Island Challenge #1

Start working in Study Island to earn great prizes!

From November 17th – December 16th, our **TZ 8th grade classes** are competing against **other TZ 8th grade classes** to become the Study Island **TZ Science** Contest Champion!

- **TWO 8th Grade Class Winners:** The **top two 8th grade classes** with the **highest number** of Blue Ribbons earned will be awarded **"SURPRISE"** class party.
- TZ Middle Schools that are eligible to compete include: Bay Point, John Hopkins, Meadowlawn, Azaela, and Tyrone, please notify Dr. Cunningham if your school will be participating.

How to WIN!

1. Make sure **all your students have active Study Island accounts with content assigned to them.** If they don't, be sure to distribute credentials to students and create a class in Study Island, as it makes pulling reports.
2. Once the class is created you can assign lessons, flashcards, and practice topics.
3. Encourage students to work through their assigned content to [earn Blue Ribbons / correctly answer questions]. Students can also choose their own topics to practice within the program to earn Blue Ribbons. Blue Ribbons are earned when a student masters a topic, passing with a 70% mastery or higher.
4. Encourage students to **track their progress** by reviewing the Blue Ribbons area in their student homepage. As an educator, you can run several variations of reports for the duration of the contest to check in on individual progress. Depending on the parameters of your contest, you may choose to run Blue Ribbon reports, an Individual Student Report, or a Class Summary Report.
