The purpose of the Practical Nursing Program is to provide training for employment in the health care industry. Graduates complete courses in caring for medical and surgical patients. Included in the program are courses that are designed to instruct candidates in the care of pediatric, obstetric, and geriatric patients, as well as convalescent, physically challenged, and rehabilitative physical and/or mental patients. Graduates are prepared to function within the rules and regulations as defined by the *Florida State Board of Nursing*.

The program length for Practical Nursing at Pinellas Technical College (PTC) is 1,350 hours about 15-1/2 months. In total, candidates in the program will complete 675 clock hours in theory and 675 clock hours in clinicals. The program consists of classroom theory, laboratory experiences, and selected clinical experiences. A more detailed explanation of essential job functions is included in the PTC online application (apply.myptc.edu). Upon successful completion of the program, graduates are eligible to sit for the national examination, which qualifies them as a *Licensed Practical Nurse*. For clinicals, PTC utilizes specifically approved, local sites; no provision is available for candidates who wish to participate at other facilities. The *Pinellas County School Board* and the *Department of Education* supervise the PTC Practical Nursing Program. It operates following the Standards established by the *Florida State Board of Nursing*, which include the number of program hours, the curriculum, and the types of clinical learning experiences that the candidate will successfully complete.
