School Board Approval

This plan is pending approval by the Pinellas County School Board.

SIP Authority

Section 1001.42(18), Florida Statutes, requires district school boards to annually approve and require implementation of a Schoolwide Improvement Plan (SIP) for each school in the district that has a school grade of D or F. This plan is also a requirement for Targeted Support and Improvement (TS&I) and Comprehensive Support and Improvement (CS&I) schools pursuant to 1008.33 F.S. and the Every Student Succeeds Act (ESSA).

To be designated as TS&I, a school must have one or more ESSA subgroup(s) with a Federal Index below 41%. This plan shall be approved by the district. There are three ways a school can be designated as CS&I:

1. have a school grade of D or F
2. have a graduation rate of 67% or lower
3. have an overall Federal Index below 41%.

For these schools, the SIP shall be approved by the district as well as the Bureau of School Improvement.

The Florida Department of Education (FDOE) SIP template meets all statutory and rule requirements for traditional public schools and incorporates all components required for schools receiving Title I funds. This template is required by State Board of Education Rule 6A-1.099811, Florida Administrative Code, for all non-charter schools with a current grade of D or F, or a graduation rate 67% or less. Districts may opt to require a SIP using a template of its choosing for schools that do not fit the aforementioned conditions. This document was prepared by school and district leadership using the FDOE's school improvement planning web application located at www.floridacims.org.

Purpose and Outline of the SIP

The SIP is intended to be the primary artifact used by every school with stakeholders to review data, set goals, create an action plan and monitor progress. The Florida Department of Education encourages schools to use the SIP as a “living document” by continually updating, refining and using the plan to guide their work throughout the year. This printed version represents the SIP as of the “Date Modified” listed in the footer.
Part I: School Information

School Mission and Vision

Provide the school's mission statement.

Cross Bayou Elementary will provide a caring and success oriented learning environment that enables each child to become a respectful, responsible and motivated lifetime learner through a collaborative effort among students, staff and the community.

Our School Motto that students can say that supports our school mission is:
C - Care for Others
B - Be Responsible
E - Exhibit Perseverance
S - Show Respect

Provide the school's vision statement.

100% Student Success. All students will make a least 1 year of academic growth per year.

School Leadership Team

Membership
For each member of the school leadership team, select the employee name and email address from the dropdown. Identify the position title and job duties/responsibilities.:

### Part III: Planning for Improvement

#### Data Analysis

Answer the following analysis questions using the progress monitoring data and state assessment data, if applicable.

**What trends emerge across grade levels, subgroups and core content areas?**

Proficiency increased in grades 3-5 in all subjects assessed. Overall ELA proficiency increased from 35% - 39%, Math proficiency increased from 43% - 45% and Science proficiency increased from 32% - 48%. Our African American subgroup also increased in overall proficiency in ELA and Math. ELA proficiency increased from 5% - 33% in ELA and 11% - 13% in Math.

**What data components, based off progress monitoring and 2022 state assessments, demonstrate the greatest need for improvement?**

SWD Subgroup had decreases in proficiency in ELA and Math. ELA proficiency decreased from 18% - 15% and Math proficiency decreased from 20% - 15%.

**What were the contributing factors to this need for improvement? What new actions would need to be taken to address this need for improvement?**

We had more students qualify for SWD during this school year, but it was later in the school year. These students did not receive the targeted ESE instruction prior to FSA testing. These students will be receiving ESE instruction as well as small group targeted instruction from classroom teacher.

**What data components, based off progress monitoring and 2022 state assessments, showed the most improvement?**

Science Proficiency increased from 32% - 48%.
Learning Gains in ELA increased from 37% - 63%.
Learning Gains in Math increased from 48% - 59%.
Learning Gains in ELA for Lowest 25% increased from 33% - 53%.
Learning Gains in Math for Lowest 25% increased from 31% - 45%.

**What were the contributing factors to this improvement? What new actions did your school take in this area?**

Focused work with specific students on their area of need.
What strategies will need to be implemented in order to accelerate learning?

Continue to use ELFAC data to guide interventions for students in grades 1-3. Use Kindergarten Readiness Skills Assessments to group students to target their areas of need more effectively. Focus on small group instructional strategies/interventions that are standards based and research-based.

Based on the contributing factors and strategies identified to accelerate learning, describe the professional development opportunities that will be provided at the school to support teachers and leaders.

PD on BEST Standards
PD on specific interventions to accelerate learning

Provide a description of the additional services that will be implemented to ensure sustainability of improvement in the next year and beyond.

PLC's focus on alignment of instructional strategies.

Areas of Focus
Identify the key Areas of Focus to address your school's highest priorities based on any/all relevant data sources.
Standards-based data (FSA, SSA, MAP, Walk-through data) collected from the 2021-2022 school year showed students performing below grade level in ELA, Math and Science with a lack of consistency in tasks aligned to grade-level standards. Students need to continue to receive Core instruction at the level of the standards, but also receive targeted small group interventions/enrichment based on their individual needs in ELA, Math and Science.

Proficiency in English Language Arts will increase 10% (from 39% to 49%) as measured by FAST.
Proficiency in Math will increase 10% (from 44% to 54%) as measured by FAST.
Proficiency in Science will increase 10% (from 48% to 58%) as measured by SSA.

We will use state progress monitoring assessments along with district assessments in Fall and Winter to measure our progress toward the goal. We will use classroom assessments to measure attainment of specific standards. Frequent monitoring and ongoing progress monitoring will be done by using the appropriate tool for each grade level in ELA, Math and Science, which will include unit and cycle assessments.

Katherine Wickett (wickettk@pcsb.org)

Monitor whole group and small group instruction to ensure instruction is designed and implemented according to evidence-based principles.

Teachers need to have a strong understanding of the standards they are teaching and need to plan whole group lessons to teach the standard. They also need to determine what academic gaps students have and plan to address those gaps during small group instruction.

Utilize administrator walkthrough tools to provide weekly feedback to individual teachers as well as communicate and highlight evidence-based practices that are impacting student achievement with the entire staff. Use specific tools for each subject area (ie: MTR for Math Practices, Science walk through tool)

#2. ESSA Subgroup specifically relating to Black/African-American

Area of Focus Description and Rationale: Include a rationale that explains how it was identified as a critical need from the data reviewed.

Less than 41% of our African American students showed proficiency in ELA (33%) and in Math (13%).

Measurable Outcome: State the specific measurable outcome the school plans to achieve. This should be a data based, objective outcome.

Increase ELA proficiency for our African American Students from 33% to 41% as measured by FAST.
Increase Math proficiency for our African American Students from 13% to 41% as measured by FAST.

Monitoring: Describe how this Area of Focus will be monitored for the desired outcome.

We will use state progress monitoring assessments along with district assessments in Fall and Winter to measure our progress toward the goal. We will use classroom assessments to measure attainment of specific standards. Frequent monitoring and using ongoing progress monitoring will be done by using the appropriate tool for each grade level in ELA, Math and Science, which will include unit and cycle assessments. Students who are not proficient in reading and/or in grades 3-5 will have weekly monitoring by their classroom teacher, ESE teacher or Hourly teacher.

Person responsible for monitoring outcome:

Rachel McClure (mcclurer@pcsb.org)

Evidence-based Strategy: Describe the evidence-based strategy being implemented for this Area of Focus.

Teachers will consistently implement highly engaging strategies that reach a diverse group of learners and interventions targeted to student need.

Rationale for Evidence-based Strategy: Explain the rationale for selecting this specific strategy.

Our African American Students do not always connect to the instruction and teachers need to use the strengths each student has to help them connect.
resources/
criteria used for
selecting this
strategy.

**Action Steps to Implement**
List the action steps that will be taken as part of this strategy to address the Area of Focus. Identify the person responsible for monitoring each step.

- Utilize students strengths when planning for instruction.
- Specifically identify the 6 M strategy being used for each lesson in lesson plans (mouth, movement, model, music, meaning, monitoring)
- Monitor academic growth of students weekly.
- Teachers will set academic growth goals with their African American students and will review these goals with students each month.
- Students will received specific interventions based on their academic needs.
- Students will be prioritized for ELP programs (ie: Promise Time tutoring, STEM)
- Students in grades 1-5 will be assigned a PCS connects device to access District programs at school and at home.

**Person Responsible**
Rachel McClure (mcclurer@pcsb.org)

<td>SWD need scaffolded support in general education classes for cognitively complex tasks. This can be achieved by using inclusionary practices.</td>
</tr>
</tbody>
</table>
used for selecting this strategy.

**Action Steps to Implement**
List the action steps that will be taken as part of this strategy to address the Area of Focus. Identify the person responsible for monitoring each step.

Use ESE inclusion model in grades 4 & 5.
Provide time for ESE teachers and Gen Ed teachers to collaborate.
Monitor SWD progress weekly and adjust instruction as needed to meet academic needs.
Walk-to-intervention model will be used in primary grades to target intervention instruction and interventions for SWD will focus on IEP goals.

**Person Responsible**
Katherine Wickett (wickettk@pcsb.org)
#4. Positive Culture and Environment specifically relating to Attendance

**Area of Focus Description and Rationale:**
Include a rationale that explains how it was identified as a critical need from the data reviewed.

Our current rate of attendance for the 21/22 school year is 90.7%. Our goal is to have an attendance rate of 95% or higher.

**Measurable Outcome:**
State the specific measurable outcome the school plans to achieve. This should be a data based, objective outcome.

The percentage of students absent for 10% or more of the year will decrease from 36% to 20% or less as evidenced by School Profiles.

**Monitoring:**
Describe how this Area of Focus will be monitored for the desired outcome.

We will monitor attendance on a weekly basis.

**Person responsible for monitoring outcome:**
Eileen Stull (stulle@pcsb.org)

**Evidence-based Strategy:**
Describe the evidence-based strategy being implemented for this Area of Focus.

Using the PBIS framework to recognize students and classes with on-time attendance.

**Rationale for Evidence-based Strategy:**
Explain the rationale for selecting this specific strategy. Describe the resources/criteria used for selecting this strategy.

In the past 7 years our percentage of students missing 10% or more of school has increased from 17% to 36%. This has a negative impact on learning. We have incentives for students and classrooms to increase on-time attendance.

**Action Steps to Implement**
List the action steps that will be taken as part of this strategy to address the Area of Focus. Identify the person responsible for monitoring each step.

- Monitor student absences through the Child Study Team and make personal phone calls to parents regarding their student's absence.
- Weekly drawing of students who were in attendance the entire week.
- Pro-actively contacting parents of students who had attendance concerns for the 21/22 school year to see how we can assist them and let them know we are still monitoring attendance.
- Have reminder signs out at car circle.
- Enforce a policy or no early release of students the last 30 minutes of the day.
- Small group counseling for students with attendance concerns to try to assist student and families.
- Start Battle of the Classes where 4 classes compete each week for the "Bobcat Belt".
- Incorporate incentives for parents to get their students to school on time.

**Person Responsible**
[no one identified]

---

**RAISE**
The RAISE program established criteria for identifying schools for additional support. The criteria for the 2022-23 school year includes schools with students in grades Kindergarten through fifth, where 50 percent or more of its students, for any grade level, score below a level 3 on the most recent statewide English Language Arts (ELA) assessment.
Area of Focus Description and Rationale
Include a description of your Area of Focus (Instructional Practice specifically relating to Reading/ELA) for each grade below, how it affects student learning in literacy, and a rationale that explains how it was identified as a critical need from the data reviewed. Data that should be used to determine the critical need should include, at a minimum:

- The percentage of students below Level 3 on the 2022 statewide, standardized ELA assessment. Identification criteria must include each grade that has 50 percent or more students scoring below level 3 in grades 3-5 on the statewide, standardized ELA assessment.
- The percentage of students in kindergarten through grade 3, based on 2021-2022 end of year screening and progress monitoring data, who are not on track to score Level 3 or above on the statewide, standardized ELA assessment.
- Other forms of data that should be considered: formative, progress monitoring and diagnostic assessment data.

Grades K-2: Instructional Practice specifically relating to Reading/ELA
Standards-based data (ELFAC, MAP, Walk-through data) collected from the 2021-2022 school year showed students performing below grade level in ELA in grades K-2 specifically with phonics. Students need to continue to receive Core instruction at the level of the standards, but also receive targeted small group interventions/enrichment based on their individual needs in ELA.

Grades 3-5: Instructional Practice specifically relating to Reading/ELA
Standards-based data (FSA, SSA, MAP, Walk-through data) collected from the 2021-2022 school year showed students performing below grade level in ELA in grades 3-5 with a lack of consistency in tasks aligned to grade-level standards. Students need to continue to receive Core instruction at the level of the standards, but also receive targeted small group interventions/enrichment based on their individual needs in ELA.

The FSA results showed that 73% of our 3rd grade students scored below a Level 3.
The FSA results showed that 62% or our 4th graders scored below a Level 3.
The FSA results showed that 52% or our 5th graders scored below a Level 3.

Measurable Outcomes:
State the specific measurable outcome the school plans to achieve for each grade below. This should be a data based, objective outcome. Include prior year data and a measurable outcome for each of the following:

- Each grade K-3, using the new coordinated screening and progress monitoring system, where 50 percent or more of the students are not on track to pass the statewide ELA assessment.
- Each grade 3-5 where 50 percent or more of its students scored below a level 3 on the most recent statewide, standardized ELA assessment and
- Grade 6 measurable outcomes may be included, as applicable.

Grades K-2: Measureable Outcome(s)
Each grade K-2, using the new coordinated screening and progress monitoring system, where 50 percent or more of the students are not on track to pass the statewide ELA assessment.
Grades 3-5: Measureable Outcome(s)
Each grade 3-5 where 50 percent or more of its students scored below a level 3 on the most recent statewide, standardized ELA assessment

Monitoring:
Describe how the school's Area(s) of Focus will be monitored for the desired outcomes. Include a description of how ongoing monitoring will take place with evaluating impact at the end of the year.

We will use state progress monitoring assessments along with district assessments in Fall and Winter to measure our progress toward the goal. We will use classroom assessments to measure attainment of specific standards. Frequent monitoring and ongoing progress monitoring will be done by using the appropriate tool for each grade level in ELA which will include unit and cycle assessments.

Person responsible for monitoring outcome:
Select the person responsible for monitoring this outcome.

Stull, Eileen, stulle@pcsb.org

Evidence-based Practices/Programs:
Describe the evidence-based practices/programs being implemented to achieve the measurable outcomes in each grade and describe how the identified practices/programs will be monitored. The term "evidence-based" means demonstrating a statistically significant effect on improving student outcomes or other relevant outcomes as provided in 20 U.S.C. §7801(21)(A)(i). Florida's definition limits evidence-based practices/programs to only those with strong, moderate or promising levels of evidence.

- Do the identified evidence-based practices/programs meet Florida's definition of evidence-based (strong, moderate or promising)?
- Do the evidence-based practices/programs align with the district's K-12 Comprehensive Evidence-based Reading Plan?
- Do the evidence-based practices/programs align to the B.E.S.T. ELA Standards?

Strategically focus K-2 teachers and instruction, where acceleration can occur more rapidly, by ensuring equitable use of resources including instructional supports, school-based professional development, cycles of coaching, feedback, etc.

Rationale for Evidence-based Practices/Programs:
Explain the rationale for selecting the specific practices/programs. Describe the resources/criteria used for selecting the practices/programs.

- Do the evidence-based practices/programs address the identified need?
- Do the identified practices/programs show proven record of effectiveness for the target population?

Use of instructional Coaches help our K-2 teachers receive side-by-side coaching and immediate feedback on how to meet the needs of their students. Ensure teachers understand the BEST Standards increases their planning for instruction.
**Action Steps to Implement:**
List the action steps that will be taken to address the school's Area(s) of Focus. To address the area of focus, identify 2 to 3 action steps and explain in detail for each of the categories below:

- Literacy Leadership
- Literacy Coaching
- Assessment
- Professional Learning

**Positive Culture & Environment**
A positive school culture and environment reflects: a supportive and fulfilling environment, learning conditions that meet the needs of all students, people who are sure of their roles and relationships in student learning and a culture that values trust, respect and high expectations. Consulting with various stakeholder groups is critical in formulating a statement of vision, mission, values, goals, and employing school improvement strategies that impact the school culture and environment. Stakeholder groups more proximal to the school include teachers, students and families of students, volunteers and school board members. Broad stakeholder groups include early childhood providers, community colleges and universities, social services and business partners.

**Describe how the school addresses building a positive school culture and environment.**
We have School-wide Expectations posted throughout the school, with specific expectations for each common area. We start the year with an Assembly to share our Core Values with all students and discuss their role in promoting positive school culture. During the year we highlight our Core Values on the morning news show each day and give examples of how to exhibit these qualities inside and outside of the classroom. Our Equity/Restorative Practices team is working with teachers to make sure that staff knows how to handle situations and to be able to effectively welcome students back into their classroom if they have had to spend time out of the classroom. We are implementing Class Dojo schoolwide as a way to consistently track positive behaviors. Each month students can earn a school-wide reward. Students have input into the school-wide incentive rewards. Classroom teachers may determine how they will use the Dojo points as incentives in their own classrooms.
We hold a monthly Assembly to recognize a Bobcat of the Month from each class (exhibiting our Core Values) and well as Academic successes. Parents are invited to these Assemblies.
We are implementing more ways to recognize staff including recognizing staff member of the month at our Bobcat Assemblies. We will also recognized staff with weekly shouts outs/weekly staff email and at our monthly staff meeting.

We will have a Book Study on the book, Better than Carrots or Sticks which will promote the use of Restorative Practices Strategies and Equity.

Students are provided opportunities for leadership roles in student groups, including PMAC, Happy Hands signing group and Bayou Crew (patrols/news crew)

**Identify the stakeholders and their role in promoting a positive school culture and environment.**

Students have an opportunity to give input into what the monthly school-wide incentive will be. Staff teaches students the Core Values and reinforces when students exhibit positive behaviors.

Staff will lead our Book Study.

Community Partners include:
EVOLution - sponsoring our Family Gathering
Rotary Club of Pinellas Park - recognizing teachers with drawings for classroom funds and grants that have been funded for our school for new benches and picnic tables.

Teachers and Administrators will be using Class Dojo as a way to positively connect with families.
