

Summer

Math at Home

Welcome Bear Creek families to summer math! It is so important for students to continue to practice their learning throughout the summer to prevent summer slide and be ready for the next grade level.

Under each grade level are THREE quizzes that can be completed. Students should click the quizzes for the grade level they just finished.

Students can receive a prize upon returning to school in August if they complete 2 math quizzes for their previous grade level AND 3 reading forms (see reading @ home page on Bear Creeks website for more info).

Let me know if you have any questions!
