

Hey, Rising Third Graders! Bounce into Summer Learning

Count money
and make
change.

Story Seashells:

Collect seashells or small stones and write a word or phrase on each (character, place, object). Create a beach-themed story using them!

Create a Mini Garden:
Plant seeds in cups or containers. Watch them grow and draw pictures of the stages from seed to sprout to adult plant.

Nature Walk: Go on a nature walk and use your senses to observe sights, sounds, smells, and textures. Record what you notice in a journal.

Ice Cream Word Sundaes:

Build an ice cream sundae with each "scoop" labeled with a juicy vocabulary word. Write a silly summer story using all the scoop words!

Reading Picnic:

Create a menu for your perfect picnic. Then, pack a picnic with books, snacks, then read together outside.

Recycled Materials

Structure: Use recycled materials to design a building or bridge. Talk about what worked and what didn't.

Create a survey question and collect data from friends.

Make and count ingredients for a meal.
