INCREASE YOUR CHILD'S LANGUAGE AND INTERACTION SKILLS

Join us to learn how to help your child develop communication and language skills. Even if your child has limited or no speech and language, you can teach your child to communicate and interact with you using a communication board. During this session, you will learn how to use this board to support communication throughout your child's daily activities, as well as during a shared reading activity.

Participants will take home a communication board, an individual daily routines/activities poster, and a shared reading book to help get started.
